## " ASSESSING THE SAUCERS "

\*\*\*\*\*

Basically then our information is gathered from these main sources.

1. Reports printed in Newspapers, Journals, Magazines. etc.
2. T.V. or Radio News Items.
3. Reports made from official circles. which includes those made by Pilots. Navigators. Radar Technicians in both Civil and Governmental Services.
4. Those made by other civilians. from leading people. academic or civilian leaders. and the ordinary man in the street.
5. Reports recieved by Societies and Groups devoted to the Investigation and Research of the U.F.O.

Firstly . The Newspapers etc. We have it on very good authority from quite a few sources that the major number of reports of U.FO. recieved by Newspapers etc. are never printed and thrown into the watse paper bin. thus it never reaches the eyes or ears of the public. in fact we have been told that some of the best sightings have recieved such treatment. and that 90.p.c, would be a good figure to estimate the unreported sightings recived in such a manner.

ASSESSING THE SAUCERS CONT.

How then can a true assessment be made whether there is a lull or that there have been "no sightings of late" when the major source of information is "gagged" by some lack of interest the cause of which could be many things which at the moment we pass over.

"T.V. and Radio. here we have a source that at least in our country does give a little attention to the subject but. to get this one has to be viewing or listening at "all times ". for quite often a news flash is put across and never repeated. and in many cases this is never given out in the papers which follow. hence here again another source is limited to us in RECEIVING the evidence to assess the number of sightings etc.

Reports from Official circles etc. The story of the gagging and falsification of received reports from these most reliable sources of Pilots etc. is too well known and has proved to research workers one of the most annoying and must be to the reporter some of the most embarrassing experiences. for too often a most reliable and extremely qualified man, will observe these things and make a report and even have the courage to say something publicly, only to find that it is followed up by some official quarter, making him utterly ridiculous by classifying it as something inane and ridiculous to any clear thinking person. when the facts are evaluated. and to put it in the words of such a one " Who wants to be made a B. fool like that, never again ". such was the confession by a pilot to the Editor. and we know it is repeated manifold all over the world. These men KNOW what they see and also that their experience is sufficient to qualify them to make an honourable and very capable estimation of what they observed, and to be placed into such a position of ridicule by a bod higher up. who wasn't there anyhow must be a most soul destroying experience that they or anyone else would not like to have repeated. hence too often the source of information is CLOSED because the person does not want to "run the gauntlet" of official ridicule being brought to bear on him . How many such sightings are lost to us we will never know. How can we then assess the matter from this source correctly?

Reports of Civilians. Here the above story can be repeated. except that we add the matter of the evidence of the first the reports being sent to the papers by folk who do have the courage to do so. and it never being printed and it is only when a minute number of these cases so reported finally reach the ears of F.S. groups. that it is discovered how information has been lost which could have been very useful at the time in assessing facts. of the U.F.O. such a case is the one reported in this edition(see Sightings ") in which a case in 1956 of a cigar-shaped object was seen , reported to the papers but was never received. publicly .

To add to these , one must put the observed objects made by hundreds of people who . know they have seen something. but fear ridicule. or loss of face. or are just very retiring types who hate anything of public notoriety. The loss of evidence in these cases must be colossal. when all weighed up.

Finally the most annoying of all but probably the least in numbers. Thank goodness. is the number of sightings that are lost to us for assessment by

So called Flying Saucer Groups. Societies. investigating U.F.O who out of petty jealousies. possessiveness. or other unexplainable and seemingly illogical reasons. know of. have evidence of. or are in possession of evidence of sightings. some of first class value. who will not SHARE it with other groups. even when requested or the other group has shown co-operation by sharing with them. but hang on to the evidence. so that THEY will have the glory. or they will be in FIRST with the story. i.e. if they publish a journal. in fact they are what the Editor terms in the title terms of today "The Exclusive Bretheren of the U.F.O. World " They grab anything and everything that others give them. but give nothing in return. ask them to join in some combined effort. which entails expense. they find some poor mouth excuse. but when the effort is in full swing they hog all the show they stopp to all sorts of tricks to get everything they can for themselves out of it. at the expense of those who have stood the brunt and possibility of loss. and well it cost them nothing. Such a condition DOES exist in the U.F.O world. as the Editor only too well knows, as do others around the world. actually in his opinion they are not worthy of being recognised. but the sad part is they are and sometimes get much publicity for many things which they made no effort for. but have jumped the band waggon. this too can be placed to the door of the many book writers who too are " cashing in on U.F.O "

Well there we have it. putting all together these sources of evidence which " hold back evidence " from whatever course, surely we must admit that we CANNOT assess whether there has been a lack of sightings or a lull purely on the basis that we do NOT HAVE ALL THE FACTS OR EVIDENCE TO MAKE THE ASSESSMENT OF SUCH A STATEMENT. and in face of this after over eight years of research work the Editor is convinced that generally speaking we only know or hear of not more than 15 p.c. of sightings. and that 85 p.c. are lost to us by the above causes.

Looking at this then in this light. surely with such a small percentage of evidence we Do have, and have recieved. the number of Saucer sightings must have been far beyond our dreams. and only shows that the subject we are dealing with despite all this hush-hush in its various forms. is the most staggering one man has given consideration to. today.

It is also a challenge to us to do whatever lies in our power to overcome in what ever way we can the above causes which deny us this evidence and at least where we can see that it DOES get released to the public. much of it we will never be able to do anything about because it is not in our power. more than a concerted effort will attain. but there ARE ways and means of overcoming some of them. If we are true real investigators. and honest in purpose and intention. we will endeavour to get things put right wherever we can. and above all not be afraid to denounce such withholding of rightful public information whenever or wherever we can. but lets be careful we do not throw stones if our own house is made of glass. for how can we expect to win respect if we are tainted with what we denounce another with.

 \* A LETTER FROM "ALAMAR". \*  
 \*\*\*\*\*

AUTHOR OF " THE TEACHINGS OF ALAMAR " A BEING FROM SPACE

Dear Brother Fred,

I am enclosing a cutting from a copy of the London Daily Mirror which I came across recently, and which I felt may prove of interest to yourself and your readers, ( See report following ) in view of the articles you have been running in your wonderfully instructive magazine " PANORAMA " , concerning " monsters" recently discovered in Tasmania. This issue of the " Daily Mirror " is dated Oct. 5th 1961 , the locale is the Indian Ocean .

It does not seem to occur to modern day scientists that prehistoric life forms have survived down the centuries having in most instances adapted themselves to submarine existence, perhaps by virtue of their great size and massive bobe structure. adapting themselves to the great pressures existant at enormous depths.

If for some obscure reason these mammoths rise frequently to the surface it could account for the stories of sea monsters, Krackens, and the Loch Ness Monster. in the case of the latter I have seen copies of movies actually taken of the monster on the surface of Loch Ness, also radargraphs of its massive form recorded on the sea bed, I do not doubt for amoment the survival of prehistoric life down to our modern day and age, the more one thinks about it, the more exciting it becomes . The specimens mentioned, or should I say discussed in your absorbing articles seem to suggest a most primitive form of amoaeba, life in its most primitive form . possibly accelerated to unnatural size by the presence of radioactive particles present in the sea water as a result of fallout from atomic tests, and the radioactive "waste" cast into the sea by various nations .

Such a possibility leads us to wonder of the ultimate effects on surface creatures, insects , and even the future generations of human beings. I note with grave misgivings that traces of Strontium 90 have been discovered in rain water in the South Island of N.Z. since the advent of the recent high- altitude Pacific tests . It would seem that my earlier warnings regarding this matter may manifest in the horrible reality much sooner than mankind imagines , a frightful retribution for interfering with the prerogatives of nature and of God.

Please bear in mind my earlier statements in which I said that the laws of cause and effect would manifest, that there could not be action without reaction . I strongly enjoin you and your readers to consider my point, for I feel you must all reach the conclusion that aterrible justice is gradually becoming evident as time progresses.

I feel that humanity has only itself to blame, warnings were given and ignored , apathy of the people has lead, and is still leading them to destructive violence. not the seen apparant form, but the slow. insidious silent, relentless , unseen creeping horror of radioactive poisoning .

AUSTRALIAN SAUCER RECORD. PAGE FIVE

ALAMARS LETTER CONT.

The processes of mutation are becoming evident in many subtle ways, and they will become more evident , more hideous as time progresses.

I am , Yours, In Service,  
Your Fellow Brother  
" ALAMAR ".

\*\*\*\*\*

The Report.

"REDS FIND ABOMINABLE SEAMAN . "

Russian scientists have discovered traces of an Abominable Seaman- a monster unknown to science.

Like the Abominable Snowman , said to roam the world's highest mountain. The Abominable Seaman has never been seen . But tracks it makes in the sea bed have been discovered .

Moscow Radio announced yesterday that the tracks - described as "gigantic" were photographed two miles down on the Indian Ocean bed by the Research ship Vityaz.

The Vityaz, now on its thirty third scientific cruise , has recently covered 30,000 miles of the Indian Ocean .

The Russians are making as big an effort to explore what they call INNER SPACE-- surveying ocean beds and drilling deep into the crust of the earth as they are in OUTER SPACE .

\*\*\*\*\*

Ed. Comments.

We can confirm the existence already of the evidence of the radio active mutations now being made on the lower forms of life. many specimens have been shown us and others reported of plant life. ( flowers, shrubs, weeds (and of lizards. with three tails ( whole colonies , not a rare few) also whole flocks of sheep. mutated in ghastly forms. ) this and other evidences point to the fact that the warnings given by Alamar and others long ago. will no doubt prove even more terrible when humans are effected. We believe they are NOW being so, but much is being HUSHED UP , and the blame put onto other things. some of which is partly due, but being greatly assisted by radio active fallout .

As we read Alamar's warnings again. we felt we could do no better than repeat the words of another great man. which we printed in the last "PANORAMA"

" TO KNOW WHAT GOD KNOWS. AND NOT TO BE WHAT  
GOD IS . IS THE MOST DANGEROUS THING IN  
THE WORLD. "

\*\*\*\*\*  
 \* AMAZING CONTACT STORY FROM BRAZIL. \*  
 \*\*\*\*\*

The following report is sent by our worthy Associate. W. Buhler as recorded is his S.B.D.E.V. Journal of April and June 1962.

See Sketches given for references.

THE A.V.B. CONTACT CASE.

Four years ago we got to know about a contact case, when a secret service in Rio de Janeiro occupied itself with this matter, but only now were we able to localise the witnesses 4 years later.. 1,500 km. away ( 36 hours, 5 buslines , one ferry boat ) from Rio and 2 of our society men ( Dr.M.P.A. and Dr. W.B. ) had the luck.to speak with the young intelligent farmers son. Dr. Buhler adds a note here. ....Research should be done on the spot by personal of the F.S. Societies so to probe also the psychology of the witness and his past. As seen in this case , the work done by the Secret services has had no use for the general public. Also it had been overheard in a deformed form. We have waited 4 years , still we could do a research in the name of truth, against the confusion mongers; as this has paid off nicely by interviewing personally the person engaged in the event, and are for this thankful to our Rio Reporter. ) Here we would like to congratulate Dr. W. Buhler and his assistants. who are at least really on the job. and not sitting around reading data and doing nothing to REALLY investigate cases he has shown that even if it took all this long journey and money and trouble of changing travel. They still considered it worth while. EDITOR.

The young man was living (5 km) near a tiny village, deep in Brazil's hinterland. To meet us, he came on horse back to the village and after settling down. showed most reluctance to speak about his 4 year old experience , he had not even communicated it to his own parents and brother, since the event was so strange that it made him reluctant . Also when he had come to the Capital on that earlier date 4 years ago. to report the event to a person known as a reporter about F.S. he then got the explanations " that it was useless to speak up publicly about his strange experience , by lack of concrete proofs" even so we violently disagreed on this matter. since there were several circumstances , as told at the end , that could have corroborated very much to endorse the report of the young and very earnest man.

(Ed. Note. It would be most interesting to know WHO this F.S. reporter was, as there have been very few of the leading men we know of flown that way. it narrows itself to a very few. i.e. if he was not what he claimed to be and some official posing as such . )

Since Dec., in that region is rather a hot month. A.V.B. , and his brother were plowing the tilled plains , near a river, at night time . as this was less hot and dusty at that period. that is approx 14 Dec. 1957, at 11.p.m. specifically 4½ years ago. . A. Called his brothers attention upon a light which could change position , each time they turned the plow . When the light got nearer , out of fear of the brother. they disengaged the plow and went home on the tractors back . . Next night . A was plowing alone , and it happened at midnight that a "star like light" approximated from the

# AUTRALIAN SAUCER RECORD. PAGE EIGHT

North in great speed and after a matter of minutes it came to a stop at the height of 100 metre over the field. but A still continued to work at his plowing. Then he took the resolution to leave for home and tried to disengage the plow from the tractor by the hydraulic gear but it failed....

Then the tractors motor went dead also and at the same time he saw the landing of a machine nearby (15 m) with two persons coming running out of it. A. Then speedily jumped on the fender of the tractor, and then to the ground. so to run away. when he was grabbed by two men from behind, and he succeeded to hurl one away over himself, but after freeing from that one. two more people and then 5 to 6 were hanging on his arm and feet and he found himself being dragged to the machine, up a 3 to 4 meter high ladder and through a door into a round room 1,7 or 1,8 m high and 2 m large (See 1-c.)

with an axis in the middle from the ground to ceiling, protected still by an outer wall (with quadrangular holes in it, as seen in electric installations). this was protected still by an outer wall, also a 0.8. high x 1m large fixed table in the form of a tripod with an instrument laying on it. (we were asked by the specific Rio reporter not to describe it. since by this means he could check on other reports, if these one day should come in) A sort of sucking flexible syringe (see 1-c) was applied on two spots beside the prominence of his chin, for drawing blood. (A thinks) then all his clothes were in incredible speed taken off him, even so using the buttons without tearing the cloth. A. even so. (we asked him) had violently resisted at the beginning. when grabbed, but he soon got the feeling that even so. that the physical power of the men was smaller than his own. but there was no use of resistance, and that he had better submit voluntarily.

The through a door he was conducted to another room, with a couch as the only furniture. covered with a sort of plastic, laid upon it, his body was moistened by a sort of sponge with a refreshing liquid. A thought first this was to clean him. as he was very dusty from his work. He had been 5 min. in the first room. but was left waiting 20 min in the second room. and nobody bothered him. he felt nauseated by the pungent smell inside the rooms and therefor vomited copiously. When the door which was leading to a third room opened, and a completely naked girl. 1.4 to 1.5 of stature entered the room and was left there alone with him. , when the two men who had brought her in left. . The sliding doors closed. and the girl immediately approached him with open arms and smiling. . she embraced him. drawing him with clear intentions to the couch, and apparently with much pleasure. .... A afterwards was puzzled, since moments before he had felt terror and had been nauseated earlier, and that all of a sudden he had should have forgotten all this. (On an afterthought he would, all this and his excitement plus the correlation of the liquid applied moments earlier to his body?) Recalling it. he said the girl had sparse blonde hair. no eyelashes he could remember, and also no cilium. or only very fine blonde ones, and no hair on her body. The ear was small, chin, lips and nose fine eyes Chinese like, cheekbone prominent (slavish) teeth white and well formed. her weight he would have guessed it as 35 to 40 kg. Afterwards ... without having spoken to him, the girl left, (we couldn't ask too many questions, since the man seemed reticent and blushing, and without experience, and since has been married) in July 1961. and when she had

BRAZIL CONTACT CONTINUED.

REACHED the door, it automatically opened , but he could not guess the mechanism of it.. He then re-entered the first room , to get his clothes and get dressed ,after which he was joined by a crew member who went with him outside around the ship on a platform which was on a level of the door. He could see all calmly now, that there was altogether the number of crew members was 5 to 6 . all clothed alike, in close to the body fitting suits of metallic scales ( he had been hurt of the hands by these scales in his previous fight) there was a large girdle which had a green light in front of it. The Feet were enclosed in rough white shoes ( apparently without heels, as the traces showed so on the next day on the soft plowed ground) their hands were covered by strong gloves and the head with a big helmet. leaving only a small horizontal gap. on the spot of the eyes. the which could not be seen , by lack of transparence ( He couldn't see eye to eye) and from behind a metallic , large , but compressed tube like structure. would lead to the helmet. emerging from a small lump which the crew showed on their backs. The men Did not speak to him , but only amongst themselves in a sort of strident(husky) language . neither sirian or japanese ( he ~~km~~ knows the sounding) All were of small stature ( shoulder height ) but the girl still had been smaller. ( A . was probably smaller than ourselves of 1.7 m. )

The machine had landed 40 m. from the river, cutting the tractor from his home ( 3 k.m. away see 1-f) by the way of the landing( obviously there would have been no use to call for help ) He didn't know the origin of the light of illumination in the interior, neither on the outside, the machine a bird-like structure 2 to 3m. height which was standing on a 3 to 4 m high tripod.(1-a 1-b ) with its main body 15 to 20 M. long, with sharpened in front piece, with a green light on it . two shorter protrances with an orange light near their sharpened protuberances . Laterally on the main body , on each side, a short half meter plank protuded , normally in horizontal position . but made a small (30deg) turn. when the machine started up in flight. Afterwards . Above , but still close the mainbody, e a 0.4 m thick , 9 to 10 m large cupola was rotating constantly. also when the craft was on the ground. producing a sort of wind. felt by the bystander. which increased sharply to a storm-intensity, when the flight began ( without heat or smell ) At the end of the main body was a vertical plate, ( rudder like) After the inspection, both A and his companion. descended the (retractable) ladder and onto the ground. the crew man with his finger made two holes in the ground. pointing to one and then skywards , then to the other and to A. but A didn't get the meaning .

Then he began to leave , at first the craft would ascend . as he could see also when the green front light changed to a bright offscuting ???(Ed query) probably means irredescent ) the only one which was then visible after the craft left the ground, which was done in an incredible speed, disappearing very fast. A. still felt nauseated when walking homewards, and still felt a painful "liver" the following three days. when small superficial ulcers would appear on his face and arms but healed immediately . Also when he looked for his tractor, the next day( see 1-f) this would operate perfectly, and the traces of the shoes of the crewmen ( without heels) and the spot where the tripod of the machine had stood and left

BRAZIL CONTACT CONT.

an impression on the soft plowed earth . could still be seen . which Mr Buhler considers is favourable proof of the contact . Also the marks on his chin , where the blood had been drawn stayed there for more than 3 years . quite visible.

A. informed us that he had not talked to anyone , (with one exception) about the event , but that his house had been floodlit twice at near several months , months before . all the court of the house had been floodlit from above. as seen , by A. and his brother, from the room . where both were sleeping. ( Sketch by Dr Mario. 1-g AVB ).

Also people at the village and neighborhood , at several occasions had seen " those lights " at night time . A, told us. when asked about it. that he wasn't desirous of renewing his experience with the craft " since it had been rather frightening " and also he had been married since and therefore ..... ) " but if it should happen again that the same craft and its crew landed once more . he wouldn't run away . "

Mr Buhler adds. and says.

1. Had the drawing of blood of A. something to do with his later meeting with the girl?. Your Editor thinks so. in fact he thinks the time lapse of twenty minutes was due to the fact they were having tests with A's blood count to determine some form of compatibility with that of the girls.

The nauseating smell may have been deliberate to " treat " A. in some way for the experience to follow.

2. Had the previous ( months before ) Illumination of A's farm house, something to do with his later experiences.?

Ed. Yes we think so , in the light of certain experiences of others in Australia. " floodlighting and Ray beams " did precede such contacts but not of the personal type as A.

3. What was the reason of the meeting with the girl?.

(a) To activate the genes and the chromosomes of another planet's race, by a stronger earth race?;

(b) Just to make a complete physical " check-up " with an earthman?

(c) Just to show earthmen that physiologically, conditions in other planets are identical ?.

(d) Just to establish an interplanetary relationship, parental, for later political or cultural purposes. ?.

(e) Just because the girl wanted (desired) it. to be done so. by her whim , since she had an heirarchical ascendancy over the rest of the F.S. crew.

Your Editor, thinks the answer of the above question 3 and the subs. was in 3 a. but could be all except that the evidence given by Mr. Buhler does not show that the girl had any ascendancy over the men. we feel he has inferred that . but knowing the full evidence may be able to arrive at that opinion. One flaw however we felt in the story was the fact of A being able to determine the language differences. for a backwards farm fellow whose contact with civilization would be very limited it hardly seems possible for him to know of Japanese or any other foreign language . We may be wrong. but on the whole knowing the high character of our associate, Mr Buhler, we do accept the story in so far as he has given it to us. and again offer to him and his workers our appreciation and congratulations.

- A TALK WITH A MAN WHO ' VISITED MARS ' From " STRANGERS . SPACE AND SCIENCE. APRIL-JUNE 1962.

The story is alleged to have happened in 1951, and was first published in " The Prince George Citizen (Canada) on Dec. 11. 1957 and we reprint it for the interest of our readers. and their own evaluation .

By Ron Powell. Citizen News Editor.

This week a man came into the Citizen News Office, and when he had left some four hours later my ears were ringing with one of the strangest stories I have ever heard. , for as you see by the headlines of this article, this man claimed that he had visited Mars in a flying saucer . At this point there may be loud bursts of laughter from all sides, but let me explain.

This man , a resident of the district who, at his request, will remain nameless in this article, dropped into the office and said in a reasonable, sincere fashion, " I have a story I would like very much to tell you, but I'm afraid you might think me completely crazy or else laugh at me. "

Such a statement , only served to whet the appetite of the newspaperman in me, and I told him to give it a whirl and find out what my re-action would be.

He then went on to tell me of being picked up in a flying saucer by a creature not of this world, and of being transported through space at a tremendous speed to a planet he assumed was Mars.

My initial reaction was one of complete skepticism and I was alert for any signs of violence while looking for an opening to ease him out of the building. But as the stranger went on with his weird tale in a calm, quiet manner , I began to relax a bit, Just a few years ago Sputniks circling the earth would have been too crazy. It was almost as if he was telling me of some trip to some foreign country . I tried to look for loopholes in his story, and tried to catch him up on the smaller details, but he couldn't be caught .

The interest for me became so great that I told him to start right at the beginning and tell his story with as many details as he could remember, and the interview is recorded below in his exact words. and by the time his story had ended more than four hours had passed. We shook hands and he went away seeming a bit relieved that someone had at least listened to him .

STRANGER THAN FICTION . After giving the story full consideration I can't say whether I believe him or not. If it is a hoax, it's a good one, and if it is the Truth, it is certainly stranger than fiction. For myself I can't help but recall the quotation from Shakespeares " Hamlet " " There are more things in heaven and earth Horatio, than are dreamt of in your philosophy " Here is the man's detailed story.

I was working for the U.S. occupation army in Austria on May 15. 1951. I was driving for Q.M. Col. Cousin, he commanded me to drive Mr Haster to Linz from Salzburg . Mr Haster was teaching evening courses to the U.S. soldiers in Linz. My job was to drive him from Salzburg to Linz three times a week.

TRIP TO MARS CONT. 2.

This particular day I came back as usual from Linz at about 11 o'clock at night and arrived at the motor pool . I live tow miles north of the motor pool . I took a short cut and on the left hand side was a brush. It was dark and there was no moon. Suddenly someone came out of the bush and came close to me. I could only see the outline in the dark but he seemed to have a helmet on. He was about my height, may be a little shorter . He had something in his hand and he pointed it at me . I thought it was his finger, but it made a click . After the click he waved his hand quickly and I went to put my arm up in front of my face , But I was paralysed. I felt like falling down but I didn't. He put a black, square plate, on my chest and strapped it around my back. I could hear a dog barking away off in the distance , but I couldn't hear him walking. He must have walked very easily. I could see his outline as he walked around me.

After he strapped the plate on me he walked in front of me and pointed the thing in his hand at the plate on my chest rather than my head as before. He walked away and pulled me after him . I couldn't move or walk, but he just pulled me after him , I wasn't actually in the air, but my feet and full weight wasn't on the ground. I seemed as if I was light . Behind the brush was a small field . and in the field, hidden from the road was around object about 150 feet in diameter. It was dark and I couldn't tell what it was. My first thought was that a spy had captured me for some reason. The thing that led me sort of rose from the ground and took me after him to the top of the object . He did something , either stepped on something or pushed some button, and a door opened, and he pulled me after him down into the dark. I was plenty scared and I wondered what would happen next. I got down into the dark and I could finally feel a floor under my feet . I knew that where I was , was either glass or plastic because the stars could be seen shining above. Then I saw the outline of what looked like a door. and he pulled me through into what later I found to be a room of glass or plastic. He kept his finger, or what I thought was his finger and later saw was some sort of pencil-shaped object. pointed at me until I was inside the room . He kept it pointed at me all the time . then when I was in the room he took it off me and I sank down to the floor. He went out and I could see his outline . There was a sort of shaking sensation . and I knew the door to the room had been shut.

The next sensation I had was of rising up into the air. I had never flown before in my life. In a few minutes I could see the left half of the moon shining. I was so scared, but I figured I was dreaming. Then I started to feel my hand and feet again. I sat up, and then got up on my feet. By this time we were in the sunlight . I looked across the ship and I could see the person that had brought me here. He was standing by a wall and there was some levers on the wall . He looked like a person. like we are. A little bit shorter than me. but to me at that time he looked like the devil.

He had no hair at all . I could see through the sort of glass helmet. His head was sort of cylinder form. a very high forehead with big eyes. you could see lots of little eyes in the two big eyes. It seemed to me it looked like the eyes of a fly. No nose at all, just two holes. He had a very small slit for

TRIP TO MARS 3.

the mouth . It looked like he had skin, but it was ort of white. There were two holes for his ears. His skull wqs very large . He ahd no eyebrows or any hair at all. The torso was round kind of like a tin can . The legs were of propertionate length . His arms were a little shorter than our arms. I would say , His hands seemd to be three long fingers .

I couldn't see any neck but he was dressed in material that was like silver , but it wasn't shiny This covered all of him except the head part which had on the helmet He didn't look at me at all.

The main part of the ship that I could see from the room I was in appeared to be round and the walls were like glass, but you couldn't see through them The floor was made of glass or plastic . In the middle of the floor , under the glass, was a black plate something like I had had strapped on my chest . from the corners of the plate which looked to be about 10 ft. square, black beams ran to the walls of the ship. I could see under the black plate and there seemed to be a duplicate room on the other side of the ship . I could see the same kind of levers on the wall as the thing was standing beside. As soon as we came into the sun , I could feel a real burning heat, but he pulled a lever and a covering , like blue water, came over the roof. Then the sun was normal , but I could still see through it.

My first thought was that I was dreaming, and then my second thought was that I was dead and my soul was rising up. The ship was not rotating or going sideways, but kind of gliding straight up. I could see the sun like a ball of fire, and the moon like a silver ball. , but the rest was darkness.

Suddenly , as I looked up the moon was right above us, and it seemed to come at us. Suddenly we were both standing on what had been the roof. We seemed to be about a quarter of a mile above the moon. I could see clearly the craters on the surface of the moon . There were lots of them . The ground seemed to be a greyish colour and I could see the rocks and hills. We ere in the sunny part of the moon then the ship glided to the right and into the darkness Then the driver stopped the ship. I could feel it sort of waiting. It was dark all around outside, but the sun seemed to shine into the ship.

I saw the thing take one of the pencil-things he had pointed at me and he pointed it downwards . I thought at the time that he must be from the moon and that he was signalling someone down below.

There was no noise at all from the ship or from the signal. After about five minutes we started to move again to the right . My first thought was that I'm going back to earth. But I looked up above me and I could see the big ball that I know was the earth. I could see the outline of America and Asia and I could see the clouds.

The earth and the moon were going away from me very fast. Then I began to think that this was from another planet .

Suddenly another planet seemed to loom up in front of us, and I thought we were going to crash into it. I was sure of this, but the driver suddenly stopped it again, but there was no jerk. I realised then that we were still quite a way from the planet , and then he started to glide sideways down toward the ground. I looked over the land , and it looked like paradise.

TRIP TO MARS. CONT . 4.

As we went down I looked out over the land and on one side there were red fields , On the other side there were what looked like grey-green fields. Some places in the fields there were what looked to be like big chimneys rising from the ground. It was a bright day-light and the sun was shining with no clouds in the sky .

We were approaching the red fields and I could see rivers with blue water in them. The rivers ran straight and at intervals there were bridges built across them , and I could see roads. The bridges were just like our bridges . From up high I could see no sign of life. Then we glided up to a field that was filled with saucers like I was in. There appeared to be hundreds of them . They were of different colours , gray. gold and silver. but there were no black or red ones. The driver stopped the ship about a quarter of a mile above them by just pulling the lever . Then we went straight down until we were about 20 or 30 ft from the ground and he parked the ship on a high platform As we went down I could see that the same kind of people were in them like my driver .

When we got on the platform and stopped, the driver pulled a lever and the glass slid back , and he went outside. He put the pencil-like thing to his chest and slowly dropped to the ground like a falling leaf. He then started to walk along very fast. to the third or fourth saucer. He pointed the pencil thing at his chest again and sort of jumped up inside the ship. He was inside that ship for about ten minutes. I could see that the thing in the other ship was smaller than the driver of the ship I was on .

While he was in the ship I looked around at the other saucers and I could see the same type of people. Suddenly quite a ways away I saw two ships that had people from earth in them. One ship was sort of dirty looking, and there was one man , one woman and two kids in it. In another ship saucer that was kind of golden I saw one man and one woman .

I was going to wave at them , but I felt scared. I was waiting for them to wave, but they didn't . After I saw them I thought that I would have to stay here with them now. Way off in the distance I could see by the river , things moving . They were dark , but I couldn't tell what they were.

Maybe they looked like a herd of beef, but I couldn't tell for sure.

Down on the ground I could see red flowers growing. they looked something like our sunflowers . There were some green patches between them , but there were the flowers as far as eye could see. . The earth could be seen in patches too. and it was the same as our earth. I got to thinking that I must be on Mars. I remembered what I had learned at school about it being red with canals and it seemed to me that this must be Mars. although I wasn't 100% sure because I kind of lost location of things when we had left the moon.

Then the driver came back from the other ship. He got back inside and closed the door again. Then we took off the same way we had come. We went up and up into the darkness. and then I could see a moon that looked like a tinball We came quite close to it, and I could see that it was smooth. and silvery without any signs of craters on it .

I didn't know where we were going then, I thought we might be going farther yet . After about another ten minutes , I could see what looked like half

AUSTRALIAN SAUCER RECORD. PAGE FIFTEEN.

TRIP TO MARS. 5.

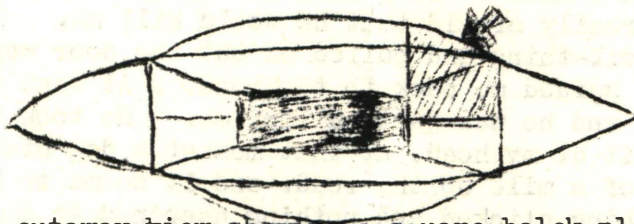

our moon and I realized that we were approaching the sunnyside of our earth. I was very glad to see that it was the earth. But we came in at it with such a terrible speed that I thought for sure we would crash . The driver stopped the ship again when it seemed to hit the atmosphere and he glided down towards earth. I seemed to know he was going to take me back to where he found me. , but I had the impression he was going to kill me because he would want to keep it secret . We came into the darkness and then went down to the ground and I knew we were back at the spot and place he had picked me up. I was really afraid that he would kill me. He opened the door . He took the pencil-thing and pulled me out the door way the way he had brought me in . He guided me back to the road. . At that time I could walk, but I was very light and he was just pulling me. He took the pencil from my chest and pointed it at my head. At that moment a dog started to bark at us from about a quarter of a mile up the road. and it seemed to have startled him , because the pencil thing clicked and nothing happened to me. I knew from the first experience I should be paralyzed, so I just pretended I was, so that he wouldn't know . He took the plate off my chest and went back into the ship. I stayed the way I was until I saw the outline of the saucer going off into the distance . Then I ran home . My wife was still up and she saw me all excited. She asked me what had happened and I told her "Nothing" I'm just sick " I couldn't tell her about the experience because she would have thought me crazy/ I noticed the time when I got home and it was 12.20 a.m. The whole trip had taken about an hour, I think when the thing pointed the pencil at my head it was to make me forget what had happened or else to kill me. I don't know which .

I have never told anyone else about this for two reasons. First.. no one would believe me and would probably want to lock me up as a crazy man; and secondly.. I am sure that those people on Mars know everything that is happening here and if I told people about it before they would have taken me away again and killed me. I'm telling this now in order to help people to know what is going on in space. My heart is bothering me now and I feel I won't be living too much longer, so I have nothing to fear from those people. From this experience I have had I feel those peoples culture and scientific knowledge is much ahead of ours. They don't need satellites to launch their spaceships and they have conquered many of the problems of space that we are still trying to conquer. They seem to power their ships with rays, maybe light rays, but it's not with motors like ours. My experience and seeing those other earth people on that planet show me those creatures have a great knowledge of the people here and are much ahead of us. This creature treated me only as an animal. After that incident I couldn't stay in that country and in October of that year I came out to Canada. I have finally felt I want to make this story public. With the two satellites circling the globe now maybe a few people will believe my story. Anyway I have told you just as I remember it happening.. and it is just as clear as yesterday .

See next page for rough sketch of the flying saucer made by the man who claimed  
ot thought he was taken to Mars.

ROUGH SKETCH OF MARTIAN SAUCER .

The above is a cutaway view showing a square black plate in the centre of the floor with beams running from the corners. The arrow points to the glass or plastic room the man was in during the trip.

EDITORIAL COMMENT .

We have given the full story as we have it. but cannot say we can accept it in its entirety. Certainly investigation could prove if the man was in Austria at the time he said he was. and also the names he gave. Some questions occur which would help if it were possible for them to be answered. had he been a science fiction reader? Such stories as he gave are not uncommon. Is it possible that the whole experience may have been some form of dream. or hypnotic trance. self induced. or caused by tiredness? Why did he think they wanted to kill him. up to the whole end of the story there had been no real act of hostility or ill treatment except for taking him away. forcibly. but he experienced no harm.

Certain facts of his story however reminds the Editor very much of a very early experience of his work. when a small school girl had been hypnotised for the means of curing a nervous disorder. and to the surprise of the hypnotist and her parents suddenly started talking of being in a saucer and being taken somewhere. Ultimately this led to an investigation by the Editor and the current committee. where the child was again hypnotised and she again related to all what she saw and heard. she was cross questioned and trick questioned and all forms of tests to make her disprove what she was relating. but she came out 100 p.c. some of the facts have very similar flavour with the above but. in no way resemble others. but she was not in a saucer physically. only mentally. could it be that this is what happened to this man who we think was quite sincere when he said he thought he had been taken there.?. On the other maybe he did have this ride and told us what he did see and experience.

We can only leave it to our readers to evaluate and we welcome their opinions in either way .

NEWS ITEMS OF INTEREST

=====

We have just recieved news of the amalgamation into a unified group of the major Saucer Groups in Engalnd and Scotland. to be known as the British .

We cannot commend too much sucha project for we have always urged that UNITY is most essential and it is with deep regret that our efforts here in Austrália did not meet with the same success. It is true that other groups here amalganted and The Australian Flying Saucer Research Society. was invited to join such a group, but upon consideration of the demands laid down for such unity, the cost of our liberty we felt was too great. for what was offerred. Hence it continued on as an Independant group and has remained so and has donemore work and efforts than any other single or combined group to spread the knowledge of UFO in Austrlia.

One thing which the British Group has adopted is that they will not take into consideration any form of psychic. evidence. Here we feel they are making a grave mistake for who is to say just how far the ramifications of t e Saucer evidence reaches and from what sources it can discovered the answers. ?.

The Editor has insisted that the whole of the UFO subject is in practical and literal ways. "completely out of this world" because it concerns things and people which are 'not of this world' therefor any approach to unders stand them or it. must have an out of this world approach and conception and just because the evidence does not always fit into the set pattern of our much esteemed Text books. it should NOT be cast aside as being beneath our consideration of investigation.

Hoaxes and Charlatans there will be, but is it not our job to sift it out? and for the sake of TRUTH show the Chaff to be what it is . but to reveal the pure seed. in its true evaluation. Such he considers is the true real investigator and research worker .

He admits that there is a LOT of chaff amongst the trance mediumship ev- idnce . but he cannot in honesty class it all as worthless. and also much has been brought forward by "telepaths" ( Psychics) who have never been in a trance or under mediumistic control , and some of whom would be most horrified at such a thought .

However one thing is most commendable for the British assoicates in that they have founda common ground upon which to agree , despite any obvious differences they may have in their approach to the subject and herein lies the great lesson for us all , in our many diversive forms of research, i.e. that we find this common ground upon which we DO agree and work from that leaving the things we disagree to the other fellow. in perfect British Lib- erty. to have his own opinion . as long as that rule is applied there Can and WILL be UNITY. but as in the case of some efforts , the insistance by any one group over another to relinquish the right to their opinions , in favour of UNITY , can never be a means of bringing about what they expect to achieve. for we must not sell our personal right of opinion. but agree on that which we CAN agree and , agree to disagree on the things we Cannot. Real brotherly Love is such and CAN AND DOES WORK IF WE ARE HONEST WITH OURSELVES AND OTHERS.

NEWS ITEMS CONT.

One of our Japanese Correspondents and Co-workers reports , that there has been quite a split over there in one of the main groups. , over the reliability of George Adamski and his evidence. and remember this comes from a group who were very much for Adamski. They even go so far as to doubt the desert contact . but your Editor feels that this is very much due to the influence of the phoney claims put forward by Leon Davidson who claimed that the whole desert incident. was a faked up job by the Central Intelligence Agency of the USA. However this has been proved beyond doubt that this claim by Davidson was a lot of hooey. and evidence which your Editor has , seems to indicate that here again we have to be very careful who we listen to, and be sure and find their background. and more Who they are working FOR. Find out who their associates etc. are and you will soon find out if in the background they are working for the very mob who are using all forms and means to silence the subject. by ridicule, innuendo, and falsifying of evidence. and even much deeper than that .

To our Japanese brothers of research we would say . dont let your confidence be shaken by the fact of a mans titles and position . after all some of the greatest men , have been men who were made to say what they have. and often are tools willingly or unknowingly. in the hands of great forces which they could not control.

Your Editor has freely expressed himself of his feelings re G.A. and whilst he feels that George has " changed " he does not feel that this makes the desert story a lie. rather . knowing the powers of the silence group. he is not at all surprised that they have by the usual subtle methods . overcome one of their biggest obstacles by confusing the picture .in causing George to change , how we will never know why. and thus undermining the confidence of those who place their faith in his evidence. This does not alter the TRUTH. that never alters , only the relater of it CAN .

Find out how much the Silence Group are behind all this . and you will KNOW why. all these things are happening and upsetting public opinion. against KNOWING THE TRUTH ABOUT SAUCERS AND SO MANY OTHER THINGS.

We regret to announce the death of two of our very good correspondents in the USA. both of whom worked very closely with each other namely Mrs Sarah Stair. and Mrs Hill. The full facts as yet have not reached us but we will miss the very beautiful writings and messages of these two devoted women . VALE GOOD FRIENDS.

MOTORIST SEES SKY OBJECTS

What may have been ameteor was seen, about 7.55 p.m. yesterday by Mr John Cleary, radio technician ,of Parkside.

He said he was travelling south along Duthie St ., when he saw it travelling south -east for about two or three seconds , before it went below the level of the roof tops.

" It had a large, green-yellow tail, and was too big for a rocket . "he said.

\*\*\*\*\*

Our Associate Herb. Clark of Vancouver reports.

My older boy Bert. Jnr. arrived with Mince Meneely at the latter's home at about 10.15 p.m. to find his dad and his mother outside with glasses.

Alan Meneely looked out of their front window to see what he took to be the " evening Star " south across the city from our North Shore , about over the International Airport . -- when it took off . It zig-zagged and hovered over the city , then moved to the zenith and was joined by a second . It was then that the boys arrived . they all saw the objects.

They called me but I was not out soon enough. they moved off to the east Alan said that after all the years he has studied the phenomenon . it was the first time he was really satisfied he had seen a U.F.O.

Thank you Herb.

\*\*\*\*\*

A REMARKABLE BUT BELATED REPORT.

In recent conversation with an esteemed friend the Editor was told by him of this very early experience which occurred approximately about 1956 or 7.

The Observer was then the District Council Clerk of a well known town North of Adelaide and as such was a very highly respected individual.

He says that one Saturday evening he was walking from his home and was passing along the main Street . of the town , when he suddenly observed in front of him and at an angle of about 40deg. high above a line of high pine trees, a large cigar shaped object, he estimated it to be about a mile to a mile and a half away. but was not certain of this exactly. The object was dark in shape and colour. but had about twelve or more portholes in it. His age was that he was quite conversant with most normal aircraft. and he was certain he had never seen anything like it before. , its cruising speed when first seen he judged to be about the normal speed of a fast plane. but when it left he said the speed was colossal and impossible for any known craft of earth. It travelled along a straight trajectory and was heading South from North. and in line with a gulf area adjacent.

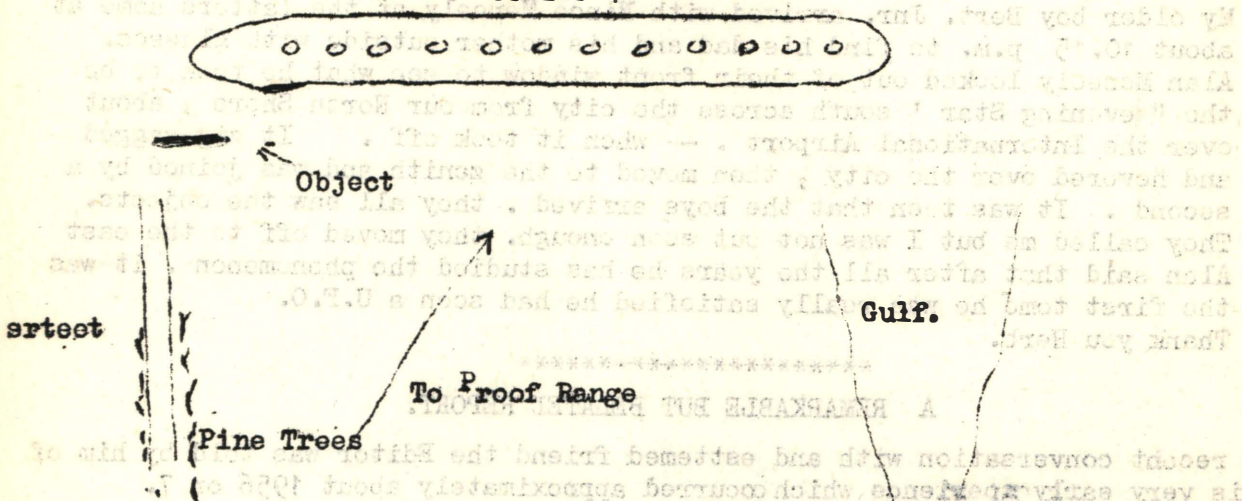

As he lived near to a Military shell proving Range. he thought it could be some form of target sent up. but doubted it. to satisfy himself he rang the Commandant of the Proof Range. and enquired and was assured that nothing of that nature was being used by them and that in any case no practicing of any kind was in progress at the week end. The Commandant suggested he advise the papers of it. which he did later but no report was made of this in them.

SIGHTINGS CONTINUED.

He was rather reticent to make the matter widely known as he is a quiet living man and did not relish any adverse publicity. It was only that the Editor was discussing the matter of U.F.O. when he came forward and offered his story. After travelling along for about 2 minutes the object suddenly veered to the East and in a flash was gone. It was this behaviour that made him feel it was NOT a usual craft of earth. the speed he knew be impossible for such as well as the terrific turn of the craft. The time was early evening and everything was quite clear. and visible. He was adamant that it was not a clud or any meteor or anything he had either read, seen, or heard about beofre. He drew a rough description of the object and the location which is given below. and beofre this event he had no thoughts and or any interest in the subject of Flying Saucers, in fact considered the whole matter a complete matter of fantastic hallucination on the part of Americans. from where occasional reports had been made to that date in the papers.

OBJECT

The Editor would like to add that it is along this Gulf and an adjacent one (See map of S. Aust) that 90 p.c. of sightings have occurred in this State. This also is one the rare reports of motherships seen and reported here in Australia. , but this is possibly due to the same factors as the above. many could have been seen as well as the Flying Saucers. which have never reached the public eye in reports of papers etc. One wonders how many such sightings get thrown in the waste paper bin of the newspapers. , what a gross loss of valuable evidence is cast aside like this. If all were known the percentage of real sightings would be colossal according to a statement made to the Editor by w well known journalist. and there would be no doubt in the mind of the public. Its the old story of the Silenee Group at work.
